COLLEGE REUNION IS SET OCT. 22

Fourth annual Porterville College alumni reunion will be held Saturday, October 22, in conjunction with the Porterville-Coalinga college football game, it was announced by Loren H. Schmid, alumni association president, who said his committees are planning to make this year's "gathering of the clan" the "best yet."

A varied program is being planned, according to reservation letters which are being sent to alumni of the school. Registration, a coffee hour and get-acquainted session will be held from 4:00 to 6:00 p.m., Saturday at the Porterville Elks club, followed by a buffet dinner and business meeting from 6:00 to 7:30 p.m.

The "old grads" then will attend the Porterville-Coalinga game at the college stadium, where a

Harvest Holidays Will Offer Big Three-Day Show

Delano's Harvest Holidays, October 7, 8 and 9, will this year feature an RCA-approved rodeo, dances, a junior fair, a kiddie parade and other entertainment with the neighboring community planning to play host to a record crowd.

The rodeo is slated for the afternoons of October 8 and 9 at Delano Memorial park, where world champion cowboys will be competing for national ranking points. Following the final rodeo, free entertainment and a talent show will be presented at the rodeo grounds.

Opening day of the celebration, (Continued on Page 10)

SPRINGVILLE HORSE SHOW OCTOBER 23

Boy and girl riders, through 18 years of age, are invited to compete in the fourth annual Springville Junior Horsemen's show, the afternoon of Sunday, October 23, at the Gill arena above Springville. The show is sponsored by the Springville Lions club.

Events this year will include: Barrel race, stake race, cowboy race, musical chairs, lead race, pleasure horse class and novice stock horse class. Trophies and ribbons will be given in each event; a grand prize will go to the champion rider.

Detailed information, with age specifications in the various events, can be obtained by writing to P. O. Box 206, Springville, or by telephoning Springville, 68.

Admission charge this year will be 50 cents for adults, with children free. There is no entry fee for show events.

Committee handling arrangements is composed of: Joe Ainsworth, Ted Stancliff, Charlie Henson, and Frank Kibler. The show will start at 1:00 p.m.

Ducor 4-H Charter Night Meeting Oct. 10

Annual charter night program for the Ducor 4-H club has been set for October 10, in the elementary school cafeteria, with various awards to be made and with special entertainment planned for the evening.

New officers of the club will be officially installed and outgoing officers recognized. Refreshments (Continued on Page 2)

TWO PORTERVILLE young people this year maintained their "monopoly" in the fat lamb division at the Tulare County fair — Andy Gravlee, Future Farmer, exhibiting the grand champion lamb of the show, and his sister, Janet, Vandalia 4-H, showing the reserve champion. Last year, the situation was reversed — Janet had the grand champion, Andy the reserve champion. (Farm Tribune photo)

Yacht Trip, Duck Farm Described By Porterville FFA Exchange During Summer Visit To England

By Joe Faure Jr.

This week finds us at Wilton Hall, home of Mr. and Mrs. Jack Davey, and their children, Irene, Sheena and Bill; and it was a week that proved to be one of the most enjoyable and profitable of our tour. Mr. Davey is a wealthy miller who, with Messers. Press and Bly, owns Norfolk's well-known Press, Bly and Davey Mills.

The Davey home is a spacious, two-story dwelling which was used as an army hospital during the last war. It has its own bell tower, a miniature "Big Ben" and near the tennis courts is a large, subterranean bomb shelter.

The Daveys own farming interest, as such, is limited to a small herd of registered Jerseys and a small herd of registered Large White hogs. What the herds lack in quantity, however, is readily made up by quality.

Sunday morning we were up bright and early since the Daveys were holding a yachting party in honor of Larry and myself. We went to the Norfolk Broads, a maze of inland rivers and lakes. The islands, thickly populated with trees and shrubbery, are dotted with beautiful cottages. Some are very modern, others are designed along the lines of old-time dwellings, complete with Shakespearean "half timber and thatch roofs."

You also see a weird collection of yachts, sailboats and dinghies. We saw several yachts that would cost \$25,000 and up. It was a beautiful sunny day, and the whole party was great. We were on our way back to the dock when we passed a huge yacht bearing the standard of the Bishop of Norwich. He annually travels to the Broads to hold commemorative

services at the ruins of St. Benedict's Abbey, which dates back to (Continued on Page 10)

F. R. Wilcox Will Speak At Exchange Dinner

F. R. Wilcox, assistant general manager of Sunkist Growers Inc., will be the principal speaker at the annual dinner meeting of the Tulare County Fruit Exchange to be held the evening of October 10 at the First Congregational church in Porterville.

The meeting is being planned for directors of the Exchange and directors of affiliated packing houses. Mr. Wilcox will speak on activities of Sunkist Growers and general outlook for and problems of the citrus industry.

Annual meetings of directors of various packing houses of the area are now being held; annual meeting of directors of the Tulare County Fruit Exchange will be held the afternoon of October 10, at the Porterville office, when new officers will be elected and other business transacted.

WATER DIST. IS STUDIED AT DUCOR

Formation of a water district at Ducor is being sought by interested ranchers of the area, and a committee, headed by Kyle Lawrence, with Jim Hurley as secretary, is checking into procedure and plans, and attempting to determine whether or not interest is sufficient to continue with the project.

Land owners who attended a meeting Tuesday evening at the Ducor school, indicated that they would put about 6,000 acres into a district; other owners who were not present have stated they would include their land.

The proposed district would lie between Ducor and the Friant-Kern canal, mainly on the north side of the Earlimart road. Application would be made for Friant-Kern water, although there is no canal water available at present.

At the Tuesday meeting, Erling Kloster, Visalia attorney, discussed district formation and answered questions. Type of district that may be set up has not as yet been determined.

More Aphid Predicted For County Alfalfa

Problem of the spotted alfalfa aphid will be worse in Tulare county fields next season than it was this year, according to Dr. Ray Smith, professor of entomology at the University of California, who spoke Thursday noon at a meeting of ranchers, held in Woodville, during a county-wide tour of alfalfa and cotton fields, directed by the extension service.

Dr. Smith, who has been working on control of the spotted alfalfa aphid since it first became a threat in Imperial county in 1954, said his prediction was in the form of a "guess".

He said that ranchers might get by without a serious aphid threat for the first and second cuttings next season, but that by mid-summer, the problem will be worse than this year because the pest will be widely spread through alfalfa producing areas.

Dr. Smith said that the aphid survives cold temperatures, but (Continued on Page 6)

COMMITTEEMEN NAMED FOR COUNTY AGRICULTURAL STABILIZATION AND CONSERVATION COMMUNITY GROUPS

Community committees of the Tulare County Agricultural Stabilization and Conservation committee have been organized, following recent elections, with the following personnel announced for south-eastern Tulare county by H. B. Keith.

Ducor: Raymond Muller, chairman; Harry Woods, vice chairman; Herb Vogt, regular member; David Hughes, first alternate and John Cemo, second alternate.

Earlimart: Jack Phillips, chairman; Glenn Schlitz, vice chairman; Arthur Murray, regular member; Jack Twiford, first alternate and J. C. Keith, second alternate.

Lindsay: Ted Cairns, chairman; Dick Stark Jr., vice chairman; Carroll Aeschbacher, regular member; Earl Royer, first alternate and George Delano, second alternate.

Poplar: H. H. Hutchinson, chairman; Harry Falconer, vice chairman; J. A. Monroe, regular member; R. L. Hughes, first alternate and Norman Castle, second alternate.

Porterville: Bruce Borror, chairman; J. H. O. Emery, vice chair-

man.

SPORTSMEN WORK AGAIN SUNDAY

Directors of the Southern Tulare County Sportsmen's association, and other interested sportsmen, are being asked to spend another day of work, Sunday, October 2, on the organization's property south of Rocky hill. Pickups, dump trucks, mechanical loaders, earth-moving equipment, as well as plain manpower, will be needed, according to President Gene Dinkins, to get the site ready for the annual Sportsmen's turkey shoot, November 6. Noon meal will be served on the grounds.

ERROR

"Alpa" is the correct name of one of the cameras listed two weeks ago in a Burkhart Photo supply advertisement appearing in The Farm Tribune. The name was misspelled in the ad, however, as Don Burkhart says, "The Alpa is still one of the world's finest 35 mm. cameras."

Poplar: H. H. Hutchinson, chairman; Harry Falconer, vice chairman; J. A. Monroe, regular member; R. L. Hughes, first alternate and Norman Castle, second alternate.

Production of Ladino clover seed in 1955 is forecast at 4,090,000 pounds of clean seed — 10 per cent more than last year, but 16 per cent below the 10-year average.

Below average olive crop is estimated for this season.

Central California Navel oranges are reported to be sizing satisfactorily.

Ducor 4-H

(Continued From Page 1)
will be served; the public is invited to attend.

In summarizing Ducor 4-H activities at last week's county fair, Carol Hunsaker, club reporter, states that members showed two prime and three choice steers; that Bob Zimmerman had the reserve champion steer of the show.

Winning livestock judging team was composed of Don Hunsaker, Bob Zimmerman and Herb Vogt; Zimmerman also won a first in showmanship; Betty Muller placed second.

CONGRESSIONAL LEGISLATION ON WATER SUMMARIZED BY ENGINEERING CONSULTANT

By SIDNEY L. MFARLAND
Engineering Consultant, Committee on Interior and
Insular Affairs, House of Representatives

As the first session of the 84th Congress is now past history we can catch our breath and see where we stand on the legislative program. In the field of irrigation and reclamation and matters relating thereto real progress can be reported.

The very busy Interior and Insular Affairs Committee of the House of Representatives, under the chairmanship of Congressman Clair Engle, had before it 486 bills, including 107 in the field of irrigation and reclamation. The Committee reported to the House 103 bills, including 15 on water matters — of which 10 were enacted.

During the 78 Committee sessions on irrigation and reclamation and related water matters, hearings were held on 18 pieces of legislation. These included measures (1) to authorize construction of reclamation projects, (2) to amend or supplement general legislation pertaining to irrigation and reclamation, (3) relating to specific irrigation districts or specific areas, and (4) relating to compacts on interstate streams.

The Committee held hearings on legislation to authorize construction of the following reclamation projects: Trinity River Division of the Central Valley Project (California), Colorado River Storage Project (Colorado, Utah, Wyoming and New Mexico), Hells Canyon Project (Idaho and Oregon), Fryingpan-Arkansas Project (Colorado), Washita Project (Oklahoma), Ventura Project (California), Ainsworth Unit of the Missouri River Basin Project (Nebraska), and a project to authorize power development on the Tuolumne River by the Tuolumne County Water District No. 2 (California). Of these projects, the Committee reported to the House the \$225 million Trinity Project, the \$760 million Colorado River Storage Project, and the \$40 million Washita Project.

The Trinity Project was the only one of these three that passed the House. The Colorado River Storage Project was not brought up on the Floor of the House after a rule permitting Floor debate was granted in the closing days of the session, while the Washita Project failed to receive a rule. The Trinity Project also received favorable Senate action and was enacted into law.

The Committee reported to the House two important and far-reaching measures amending the supplementing general legislation which were enacted into law. One of these modifies and extends the Saline Water Research Program.

The other measure authorizes interest-free loans to irrigation districts to construct irrigation

distribution systems.

The Committee reported to the House another important measure which would supplement general legislation. This was the so-called "Small Projects" legislation which would authorize loans to public agencies for construction of small reclamation projects. This measure passed the House. Similar legislature passed the Senate, and the two versions are now in Conference. An attempt to iron out the differences between the House and Senate passed bills in the closing days of the Congress failed. This remains a matter of pending business before the Conference Committee and undoubtedly will be one of the first orders of business next year.

The Committee reported to the House three bills granting the consent of Congress to certain states to negotiate and enter into compacts with respect to the waters of inter-state streams. All three of these passed the House and were enacted into law.

Two of these measures involved California — one gives the consent of Congress to the states of California and Oregon to negotiate a compact with respect to the water of the Klamath River; the other gives the consent of Congress to the states of California and Nevada to negotiate a compact with respect to the waters of the Truckee and Carson Rivers.

Several important pieces of legislation pertaining to irrigation and reclamation are pending in the House Interior and Insular Affairs Committee and in the Congress, and these will be given early consideration next year.

Those measures still pending in the Committee which will be given early consideration include the Ventura Project, the Fryingpan-Arkansas Project, the Ainsworth Unit of the Missouri River Basin Project, and the Washoe Project. Hells Canyon will, in all likelihood, come up again. Other legislation which very likely will come up for consideration during the second session includes a series of bills relating to the appropriation, use and distribution of water under State laws, and requiring Federal officers to comply with State laws; two bills which would amend Sections 9(d) and 9(c) of the Reclamation Project Act of 1938; and several bills relating to specific irrigation districts.

**World-Wide
Communion Day
Observance Sunday**

World-wide Communion day will be observed this Sunday in most of the churches of Porterville in keeping with the observance which began some 13 years ago. With Christians keeping the day independently for almost 2,000 years the united observance has drawn some 682,400,000 Christians together.

At the Evangelical United Brethren church the pastor, Rev. Everett C. Schneider, will speak at the 11:00 o'clock service on "Fellowship", using the text "With desire I have desired to eat this passover with you before I suffer."

farm exports totalled only 19 per cent.

(Luke 22:15). Reception of members will also take place.

At the 7:30 service the pastor will continue his biographical sketches from the Bible, and this Sunday night's theme will be "Old Man Noah". Mrs. Herman Matzke will be lay speaker, the Youth Fellowship will occupy the choir, and a trio consisting of Ladona Wagner, Cheryl Propp, and Karen Schneider will sing.

Rally day will be observed in the Sunday School hour, with an emphasis upon perfect attendance in all of the classes. A brief program will conclude the session which begins with class periods being first on the schedule.

Tax rate in the Porterville Irrigation district has been reduced four cents by district directors, with new rate set recently at \$3.20.

**TIME
OUT**

By Davis Harp

Mental errors and an iron clad defense on the part of the Hartnell Panthers spelled defeat to the Porterville College Pirates as they dropped their season opener 14 to 13.

The Pirates played top notch defensive ball but had considerable trouble penetrating the Hartnell defense. Both Pirate touchdowns came through the air as quarterback Wendell Bland pitched pay-dirt pass to halfback Bruce Fife and later hit high flying Mountie Bedford for another Pirate touchdown. Bedford showed great potential as a top flight end. The Porterville College freshman made fine catches while covered by two or more Hartnell men. Tackle Bob Edwards turned in the outstanding game for the Pirates as the ex-Lodi Flame star received Player of the Week award for his fine job.

The Pirates meet a tough L. A. Harbor eleven this week in what will probably be the only chance that Porterville fans will get this year to see the single wing formation operating against the P.C. squad. The Seahawks run one of the few single wings to be seen in junior college football. In their last outing they downed a talented San Bernardino outfit 7-0. They are big, fast and also have a very capable passing attack.

Last weekend was the underdogs' hayday, in collegiate and professional football alike; it did not pay to pick the favored team. The upset that upset us the most was the Oregon State-Stanford affair. We had tabbed the Indians for a two touchdown win and found it a little hard to take when they were handed a 10-0 lacing by the Ducks. Another loss that took the wind out of our sails was the 7-0 pasting UCLA took from Maryland. The Bruins figure to be one of the stronger teams on the Pacific Coast again this season and this early loss could demoralize them.

As far as we are concerned the Pacific Coast conference title will go to Southern California with the toughest opposition coming from UCLA and Stanford. The Trojans have backs they don't know what to do with. They have probably one of the best running backs in the nation in Jon Arnett, and a potential All-American in their

sophomore fullback C. R. Roberts. But Jess Hill's Trojans have yet to meet real major league competition, their two wins to date have been over the have-nots of the PCC, Washington and the University of Oregon.

It is interesting to note that P.C.'s mates in the Central California Junior College Athletic association found the going pretty rough in last week's grid wars. The College of Sequoias Giants took it on the chin from the Yuba City college machine, 26-6. The Reedley College Tigers found the Cal Poly JV's too much to handle and dropped their contest 21-7. The Fresno J.C. Rams were humbled by the Stockton Mustangs 21-0. The only winner in the CCJCAA was Taft JC with a win over the Fresno State JV's. The worst defeat suffered by a CCJCAA team was a 55-0 trouncing suffered by Coalinga at the hands of Menlo JC.

On the high school athletic scene the Porterville High Panthers downed a rugged Madera eleven 16-0. Carl Elder's big, rugged crew did the trick with a tremendous hard charging defensive line. This week the Panthers face a toughie in the East Bakersfield Blades. It will be the High School's first home game and we figure they will be tough to beat with Mom watching.

State Report Says That "Interesting" Changes Brought By Seeding Clouds

By Bill Reece

Man's attempt to make the skies do his bidding has caused some interesting changes in California weather, according to meteorologists at the University of California at Berkeley, whose recently completed studies of some 15 artificial rainmaking programs within the state, including the one sponsored by the Southern Sierra corporation of Porterville, have been compiled in a report entitled "Weather Modification Operations in California."

The 270 page document, the first of its kind published by the state, was made at the special request of the Water Resources board, under direction of W. L. Berry, the state's principle hydraulic engineer. It is reputed to have cost some \$50,000 to compile and includes in addition to the chapters devoted to the evaluation of the artificial programs now being conducted in the state, studies of possible economic effects and legal implications resulting from these operations and recommends several methods for determining the effectiveness of the programs in the future.

There is also a delightful chapter on the historical background of man's attempt to control the weather, including of course, the exploits of one Charles M. Hatfield, rainmaker par excellence, whose unusual techniques caused one of the most devastating floods of all times to occur in California's history.

From their findings, the investigators concluded that, "Although it is not possible to credit without reservation the rainmaking operations with the difference in precipitation which were observed, there is no reasonable doubt that the amounts of precipitation from seeded storms were different from those expected on the basis of unseeded storms."

The report goes on to say however, that "Evidence indicates that often independent of the cloud seeders' intentions, some storms have resulted in increased rain, others have not been affected."

ed at all, and others have been so changed as to cause less rain than would have occurred naturally."

No evidence was uncovered by the investigators to conclude that the effectiveness of a given program was due to the type of mechanical equipment used to disperse the silver iodide crystals into the cloud masses. In fact, there is a strong suggestion contained in the report that individual program success is more dependent upon the type of personnel employed, as disclosed by the more obvious results obtained by operations who employed the services of persons trained in the basic fundamentals of meteorological laws. (Ed. note: Directors of the Southern Sierra corporation have also recognized this possibility and for the coming season have hired a licensed meteorologist to direct their program.)

It was interesting to note in the report that of the 15 projects observed, only two, the Southern Sierras and the Carrizo Plains, were still using aircraft exclusively. The others were either combination programs or solely ground conducted.

No story on artificial rainmaking would be complete without mention of the legendary Mr. Hatfield, who first came to the attention of Californians shortly after the turn of the century when a group of Los Angeles merchants hired him, in 1904, to produce one inch of rain during the month of February. The report states that he filled the order promptly in the first week of that month by delivering a total of 1.64 inches.

No doubt the merchants were as well pleased as they were impressed, because the same group contracted for his services again the following year, specifying that he produce a total of 18 inches for the season. The report doesn't say whether the eccentric rainmaker took the specific request as an affront to his rainmaking abilities but, the records show that he not only fulfilled his obligations but threw in a couple of extra inches just for good measure.

By now, his fame had spread around the world and for the next dozen years he travelled from place to place accepting contracts and dispatching them with the same precise regularity that the postman delivers the mail.

In the year 1916, in anticipation of a contract with the City of San Diego, the eccentric Mr. Hatfield set up his equipment and began operations for the express purpose of filling the depleted waters of Lake Morene reservoir on Cottonwood Creek. On January 7, storm clouds appeared overhead and Mr. Hatfield went to work. During the next 24 hours a fantastic 16.30 inches cascaded down from the heavens which not only filled the reservoir but burst a dam at Lower Ottay reservoir sending a destructive wall of water down the Ottay river with catastrophic results.

Mr. Hatfield left for parts unknown. He is reported to have died soon thereafter, taking with him to his grave the secrets he alone had discovered for unleashing the mighty rivers of the skies.

Cookies For Waist-Line Watchers

There's no need to deny yourself an occasional dip into the cookie jar when it's filled with Orange-Nut Drops, a crisp, sweet cookie developed especially for dieters. This confection, although filled with nuts, hits a low 34 on calorie meter. Secret of the cookie's low-calorie success is that it's sweetened entirely with Sucaryl, the newly improved non-caloric sweetener which can be used in cooking and baking without becoming bitter or losing its sweetness.

Along with the cookies, you can also help yourself to a tall, ice-clinking glass of lemonade or iced tea. Sweeten it just the way you like it, with Sucaryl, and you'll have scarcely a calorie to fret about. In iced drinks use Sucaryl solution, or crush and dissolve the tablets separately. For all of your sweetening, one Sucaryl tablet or 1/8 teaspoon of solution is equal to about 1 teaspoon of sugar.

Orange-Nut Drops

1/2 cup butter or margarine	1-2/3 cups sifted flour
2 teaspoons Sucaryl solution,	1/4 teaspoon salt
or 16 Sucaryl tablets*	1 teaspoon baking powder
1 egg	1/2 teaspoon soda
2 tablespoons orange juice	1/2 cup skim milk, soured
1 tablespoon coarsely grated	with 1 tablespoon vinegar
orange rind	1/2 cup chopped English
1/2 teaspoon vanilla	walnuts

Cream butter in small mixer bowl on high speed until well softened. Add Sucaryl solution, egg, orange juice, orange rind, and vanilla. Sift dry ingredients together and add alternately with the soured milk. Blend in nuts. Drop by teaspoonfuls onto greased cookie sheet. Cut through batter with edge of spoon to flatten each cookie slightly. Bake in a moderate oven (375°F.) 18 to 20 minutes, or until nicely browned on top. Store cooled cookies in a container with a loose cover.

*If Sucaryl tablets are used, dissolve in the orange juice.
Makes 56 crisp cookies. Each contains 34 CALORIES; 0.7 grams protein; 2.8 grams fat; 2.8 grams carbohydrate. If made with sugar, each would contain 49 CALORIES.

More Aphid

(Continued From Page 1)
does not do so well in wet weather; he said there is not likely to be a build-up during the winter, but that he cannot be optimistic about the 1956 alfalfa season.

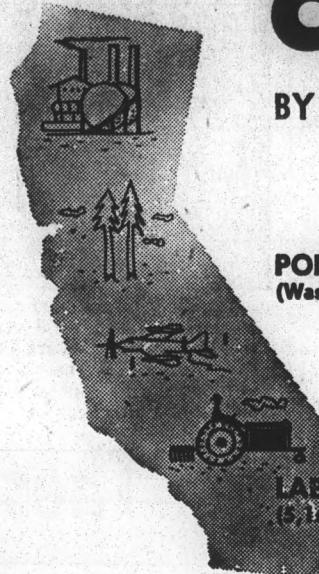

Intensive research is underway in control of the aphid he said, with efforts directed along three major lines — chemical control, resistant alfalfa varieties and parasites imported from foreign countries.

He said that results have been encouraging in all three fields of work, but that for the present, only chemicals now being used are recommended. He emphasized the importance of proper timing of applications, and the importance of all alfalfa growers in a producing area participating in a control program.

And he said that in the southern section of the state, where the aphid has been a serious problem for two seasons, alfalfa growers

"are still in business", proving that it is possible to grow high quality hay even with the aphid present.

In commenting generally on this new pest for Tulare county, Dr. Smith said the aphid is spreading generally toward the north, fanning out from 99 highway; that it is also appearing in central coast producing areas.

Without proper control, he said, the aphid can not only damage hay, but may also cause loss of field stand, particularly in young alfalfa fields, and among seedling plants. He cited the case in a Kern county field where stand was reduced 85 per cent simply because there was no aphid control on last cutting of the season.

He said that each grower must watch his own field and take control measures as needed. He said that it is advisable to plant new fields in the fall, to allow them to get established by spring, rather than to plant in the spring, as long as the aphid is a threat.

Dr. Smith said that cost of aphid control can run from \$2.00 to \$4.00 per ton.

He said that there is some indication that use of sprinkler irrigation is unfavorable to the aphid, but he pointed out that sprinkler-irrigated fields still have aphid.

Chemicals being used in aphid

control are malathion, parathion and cystox; he said that as yet dusts cannot be recommended.

Dr. Smith said experiments are underway in treatment of seed to protect young stands of alfalfa, but that no recommendation on this can be made now.

He said the aphid spreads by any means of transportation; he said that he would not recommend "preventive" treatment during the winter to improve the situation next spring.

"Treat the problem as you find it," he told the ranchers.

Also speaking at the meeting was Dr. F. T. Addicott, from the department of botany, UCLA. He discussed results of research in relation to improved methods of cotton defoliation.

(Reprints from old newspapers, provided through courtesy of Zoe Claubes, of Claubes Pharmacy)

April 15, 1904

H. F. Brey, manager for the Central California Redwood company, left for the Dillonwood mill, Wednesday, to start the mill running for the season.

It is the company's intention to cut 50,000 feet of lumber daily, most of which will be redwood, the balance being sugar pine and fir. Employment will be given to over a hundred men when the mill is in full running order, which will guarantee busy times on Upper Tule during the coming months.

C. A. Elster, who was in town, Tuesday, expects to have his mill near Mountain Home running in a few days, and expects to cut a million feet of lumber this summer.

Since the first of February, twelve carloads of orange trees, averaging 900 trees to the car have been shipped to Porterville from the southern part of the state, and have been inspected by Commissioner Talbot and found to be free of scale. Besides these trees, which have been set out, quite a number have been purchased at Lindsay, Exeter and from the nurseries near Porterville.

Aubrey M. Lumley hereby announces himself as a candidate for re-election to the assembly, 27th district, subject to the action of the Democratic convention.

H. Mitchell was down from White River on business, yesterday.

DR. R. H. NATZKE OPENS OFFICE IN PORTERVILLE

Dr. Richard Harry Natzke this week announced the opening of his offices at 505 N. Hockett Street in Porterville, for the practice of internal medicine.

Dr. Natzke attended elementary and high school in Porterville and received his pre-medical education at Porterville Junior college and Occidental College in Pasadena, obtaining his M. D. degree at the University of California Medical school in 1949.

Following a rotating internship at Franklin hospital in San Francisco, Dr. Natzke spent three years in hospital training at the University of California hospital and the Veterans Administration hospital in San Francisco, in the field of internal medicine. From June, 1951 to July 1953, he served as a medical officer in the United States Air Force in this country and in Japan.

Dr. Natzke is married and resides with his wife, Nan, in the Plano district, south of Porterville.

Alfalfa Hay Production Up

In spite of adversity, alfalfa hay production in California is now estimated at 4,884,000 tons this season, slightly more than was

produced last year, however, production per acre is expected to be lower — an average 4.40 tons compared to 4.65 tons last year and a 4.56 10-year average.

Alfalfa this season started poorly because of cool spring and early summer weather, then spread of the spotted alfalfa aphid hurt production through much of the state's producing area.

STATE INCOME IS RUNNING HIGH

California's general reserve fund revenues for the first two months of the present fiscal year rose \$24,562,340 above the same period last year to indicate the state's continued high level of economic activity, according to Robert C. Kirkwood, state controller.

General reserve revenue for the months of July and August were \$154,974,224 and the treasury balance was \$109,391,820 on August 31, about \$9,000,000 more than last year's comparable balance.

ORANGE PRICES UP

Active demand brought a 25 cent per box increase for Valencia oranges during the week ending September 23, with f.o.b. average going to just over \$4.55 per box. There was little change in the lemon market, at about \$5.40 per box f.o.b.

CYA CAMP BEING BUILT NEAR MARIPOSA

California Youth Authority camp that at one time was scheduled for construction at Springville, is now being built at the Mt. Bullion site, near Mariposa. The camp, to house 90 men, will cost \$318,983.

The present CYA camp located at Coarse Gold will be moved to the new location. Plans to construct the new camp at Springville were dropped several months ago when opposition developed in the Springville community.

California rice crop this year is forecast at 10,923,000 bags, slightly more than last year.

ELECTRIC COOKING IS TODAY'S BIGGEST BARGAIN!

SOUTHERN CALIFORNIA EDISON COMPANY

Sermon in Miniature

By Everett C. Schneider, Minister

Almost four years ago, shortly after arriving in Porterville, I provided a browsing table in a conspicuous place in the church on which I placed some of my choice books, including a copy of "The

Kneeling Christian" by "An Unknown Christian". This book which had greatly influenced my life was picked up by our class leader, who in turn purchased six copies on his own and distributed the same amongst the members of the church. This quickened our prayer meeting, and it was, with the need of praying for a college girl who had contracted acute leukemia, the means of beginning other prayer meetings.

One day Philip the Evangelist was going from Jerusalem to Gaza on the Lord's orders (Acts 8:26) and met an Ethiopian riding in a beautiful chariot, for it belonged to his queen, Candace. "Then the Spirit said unto Philip, go near, join thyself to this chariot." (Vs. 29). The Ethiopian was reading a book which he had picked up in Jerusalem, and the first question that Philip asked led to this man's conversion. It was "Understandest thou what thou readest?" Perhaps the Ethiopian found that book on a browsing table in the Jerusalem temple.

One day a bishop was entertained in the Sunday School superintendent's home. The host was a wealthy sheep rancher in Montana. While waiting for dinner the rancher showed the bishop his library on raising sheep. When they had finished looking at the well-filled shelves the bishop asked, "Now may I see your library on the work of the Sunday School superintendent?" (There wasn't any!)

FINS FUR FEATHERS

By Phil The Forester

While it's much too early to evaluate the inland deer season so soon after the opening, the Shaver Lake checking station did show a drop of a few hundred hunters the first two days and a reduction in the number of bucks taken, about nine percent less. Previous reports revealed a reduced deer population in the Huntington Lake area but results can not be tied in with this as fewer huntres would be expected to take fewer deer. Twelve bear were checked through the Shaver station.

Barton Flat produced rather surprising figures for the first two days with 184 bucks checked through as compared to 165 for the same period last year. Fourteen bear were taken by hunters in this area.

The Mineral King special hunter's choice deer season will run from September 29 to October 4 and October 6 through the 11, all dates inclusive. For this Tulare-Fresno county event, 500 permits were issued. This is a Federal refuge under the jurisdiction of the U. S. Department of Agriculture (only one of its kind) and any black bear encountered during the special season may not be taken.

Want a job with fish and game as a junior aquatic biologist with a salary range of \$395 per month or as a forestry trainee with the same salary range? These two civil service positions are available with the final date for filing applications being December 16. If interested call at your nearest department of employment office.

Southern Tulare county wildlife officials report quite a few doves remain in the area but no hunters. The last day of the season on this migratory bird will be October 2.

Wild band-tailed pigeon season will not open until December but we have reports of large flocks in the Northfork of the Kaweah river and the Blueridge area. If enough food is available, they will probably stay where they are at present.

We are rather enthused over the quail cooperative hunting area for the Keystone district of Stanislaus-Tuolumne county. This area of ten ranches operated by seven ranchers include about 16,000 acres of private land which will be open Saturdays, Sundays, Wednesdays and holidays throughout the open quail hunting season and can accomodate about 200 hunters per shooting day. The area will be operated on a first come first served basis but it's doubtful the quota will be filled at any time. Pheasants take the bulk of the pressure for the opening.

Trout are being taken in the

Church Work Day Said Successful

Over 50 adults participated in the highly successful church workday last Saturday at the First Congregational church of Porterville. Sponsored by the board of trustees, numerous projects on both building and grounds were completed.

General coordinator of the day was Dean Testerman, chairman of the board of trustees, with John Daybell, supervisor of garden work. Frank W. Sheldon was in charge of the carpentering crew. Carl Hinton was "foreman" for building clean-up.

In addition the following men and boys participated: Eldon Ball, Aram Garabedian, Dr. William Torrance, Ray Reising, Albin Baker, Charles Patmore, James Richards, Richard Moore, Harold Moore, Dean Smith, Allan Leslie, Herb Foerster, Hugh Monroe, Roland Crosiar, Bill Alexander, Robert Crabtree, John Keck, Leonard Longley, Dewey Stratton, Roger Wells, Bud Faggart, Ed Landgraf, Terence E. Stoker, Eddie Ball, Kenneth Hinton, Eugene Hinton, Charles Patmore, Jr., and Rick Keck.

A noon-day pot luck luncheon was served by church women under the leadership of Mrs. Little and Mrs. Willis. Other women who provided food and helped serve were: Mesdames Wright, Hinton, Ball, Smith, Patmore, Zimmerman, Stone, Farnsworth, Flory, Hubler, Henry, Guthrie, Monroe, Testerman, Stratton, Toole, Wilcox, Musick, Torrance, Crabtree, Foerster, Alexander, Crosiar, Richards, Butterbaugh, Eldridge, Storme and Miss Keller.

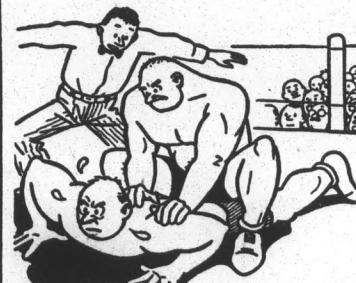

Navy Officer Examination Set

Competitive examination for high school seniors who desire to attend college and train for careers as U. S. Navy officers will be held throughout the United States on December 10; applications must be filed by November 19.

Full information on the program can be obtained at Porterville high school or college, and at the Navy recruiting office in the Porterville post office building.

Practically all of the state's bunched carrots are coming from the Salinas-Watsonville area at present.

Kings river below Pine Flat. The end of October is the end of the summer trout season.

RECORD HIGH CORN PRODUCTION

California will produce a record corn crop this year, with estimate now at 12,650,000 bushels; the previous high was 7,680,000 bushels in 1954.

From

Daybell

Nursery

By John

The fair is over and everyone has returned to gardening. We enjoyed the fair and we're all for it but we certainly are glad to see you people back again. We were also happy to see exhibits of many garden aids we sell over here on "E" Street. Materials such as Soylaid, Vita-Peat, and Calunite.

After looking over names and slogans used by these various plant aiders, we believe the nursery business is catching up with the soap industry. While the Soylaid company obviously doesn't know how to spell soil they do claim to have "the key to rich soil." Whether the key is included in the bag isn't stated.

Vita-Peat is hailed as "the organic soil conditioner." This may only mean it's a sack of manure (which it isn't) but it sounds good anyway.

Calunite claims to be "the all purpose plant food." This covers a lot more territory than the other two. Sort of a "Duz does everything" to the plant world. Likewise "only Calunite contains Alunite." Now alunite may knock your plants dead but the rhyme is good and that's important.

Another product which we peddle is Lush. Comes in a box like soap flakes. Lots of color and loads of slogans. Lush is "the miracle planter mix." Doesn't say what the miracle is however. Maybe a miracle anything will grow in it. Likewise it is "air-conditioned." This you know anyway when you pick up the box. Must be loaded with air.

Actually, these products work regardless of the advertising and if you're having plant trouble they are well worth trying. It really is hard to grow a "five dollar plant in five cent soil." Just add any of these to your ground, water thoroughly, and stand back. The least you'll have is "million dollar mud."

In the Superior Court of the County of Tulare, State of California

OLA HUTTON, Plaintiff

vs. J. E. HUTTON, Defendant

THE PEOPLE OF THE STATE OF CALIFORNIA SEND GREETINGS TO: J. E. HUTTON, DEFENDANT.

YOU ARE HEREBY DIRECTED TO APPEAR and answer the Complaint in the action entitled as above, brought against you in the Superior Court of said County of Tulare, State of California, within ten days after the service on you of this Summons, if served within this County, or within thirty days, if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or Plaintiff will apply to Court for any other relief demanded in the Complaint.

Given under my hand and seal of the Superior Court of the said Tulare County, State of California, this 8th day of June, 1955.

**COUNTY OF TULARE
STATE OF CALIFORNIA
NOTICE TO CONTRACTORS**

Office of the Clerk of the Board of Supervisors of the County of Tulare, State of California.

Sealed proposals will be received at the office of the Clerk of the Board of Supervisors, Court House Building, Visalia, California, until 2:00 o'clock p.m. on October 11, 1955, at which time they will be publicly opened and read, for construction in accordance with the Plans and Specifications therefor, to which special reference is made, of a drainage system in Tulare County west of the City of Porterville in the Schulz Subdivision and in the Quinn Subdivision along Wisconsin Avenue (Road 239) and Putnam Avenue (Avenue 154) with the necessary drop inlets to be constructed.

Bids are required for the entire work described herein.

COUNTY ROAD COMMISSIONER'S ESTIMATE

ITEM 1. 1950 L. F. 16 in. Concrete Irrigation Pipe.

ITEM 2. 75 L. F. 12 in. Reinforced Concrete Pipe.

ITEM 3. 5 Each 18 in. drop inlets.

In accordance with the provisions of Section 1770, of the Labor Code, the Board of Supervisors of the County of Tulare has ascertained the general prevailing rate of wages applicable to the work to be done as follows:

Skilled Labor

Classification: Carpenter \$2.70

Cement Finisher 2.67

Concrete mixer operator (one cubic yard capacity or less) 2.38

Concrete mixer operator (over one cubic yard capacity and paving type) 2.71

Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard) 2.93

Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard) 3.10

Reinforcing steel worker 2.75

Roller Operator 2.77

Tractor Driver 2.77

Truck driver (18 cubic yards water level capacity or more) 2.49

Truck driver (14 cubic yards water level capacity) 2.36

Truck driver (8 cubic yards and less than 14 cubic yards water level capacity) 2.29

Intermediate Grade Labor 2.10

Concrete vibrator operator 2.10

Jackhammer operator 2.10

Truck driver (4 cubic yards and less than 8 cubic yards water level capacity) 2.09

Truck driver (less than 4 cubic yards water level capacity) 1.99

Unskilled Labor 2.00

Flagman 2.00

Laborer 2.00

Positions not listed above will be allocated in accordance with the definitions which appear in the Special Provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than \$2.10 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than \$2.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than \$2.00 per hour.

Overtime — one and one-half (1½) times the above rates.

Sundays and holidays — one and one-half (1½) times the above rates.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Board of Supervisors of the County of Tulare does not expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, as may be deemed necessary or expedient by the said Board of Supervisors.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), sub-article (6), of the Standard Specifications regarding the use of domestic materials and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

All bids are to be compared on the basis of the Road Commissioner's estimate of the quantities of work to be done.

No bid will be accepted from a Contractor who has not been licensed in accordance with the Provisions of Chapter 9 of Division 3, of the Business and Professions Code.

Harvest Holidays

(Continued From Page 1)

October 7, will start with a kiddie parade, followed by junior fair judging. Billy Mize, Cliff Crawford and their Chuckwagon Gang, will play for dancing in the evening.

An old-timers' picnic is slated for noon, October 8, a cutting horse contest at 1:30 p.m., then, following the rodeo, a square dance festival in the Delano armory.

Apple harvest in California will be late this year, not getting underway until the last of this month.

Grape harvest is running 10 days to two weeks behind normal years.

College Reunion

(Continued From Page 1)

block of seats will be reserved. After the game, an informal dance will be held at the Elks club for alumni and guests.

On Sunday at 2:00 p.m., the Associated Students of Porterville College will host the alumni at an open house on the new campus.

Schmid said the cost for all activities, in a special "package deal", would amount to only \$3.50 per person. Reservations are to be returned by October 18, and if any former students have not received invitations, they should contact Schmid at his residence at 1737 Division Street.

He said it was also possible to secure associate memberships in the alumni association. These are available to those who did not attend the college, but who are interested in its activities.

was cleaning up a disease in his flock that had been taking a weekly toll of 25,000 birds. New ducks arrive at the ranch every Friday and he pays for them the following Tuesday. Since many ducks were dying over the weekend, he was for a time in the position of actually paying for dead birds.

He has his own processing plant and handles his own packing and distribution. His feeding practices are quite efficient; he buys in large quantities and mixes his own ration, taking advantage of "bargain feeds". For example, he had 40 tons of scraps left over from "fish and chips" shops (deep fat fried fish and French fries) and he also had 10 tons of surplus caramel popcorn, of which the ducks are very fond.

His bookkeeping system was very thorough; so much so that two secretaries were handling his records. His income totals over a million dollars annually. His hobby is gardening, and his greenhouse was a real splash of color that surpassed any "gardening" I saw in England.

Another industry that we visited was the Press, Bly and Davey mill. It is very modern; the owners take advantage of mass production and volume buying to pass savings on to customers.

This mill has produced the feed for several international livestock champions. One of its recent "victories" was Brenda, the Supreme Champion of the London Dairy show. In honor of this animal, they produced her ration for market, calling it "Brenda's Feed." This is one example of their clever advertising and promotion.

The next day we called at the Matthes Bakeries in Yarmouth. This is one of the largest bakeries in England; mixers, baking units and other equipment is extremely modern. When I asked how much bread the bakery produced, I got the answer, "We can't tell you, but last Saturday we produced enough bread so that if loaves were placed end to end, they would reach 12 miles." I guessed that this would amount to about 100,000 loaves of bread.

The following day Mr. Mosely came to take us to Lincolnshire county, thus ending our stay in Norfolk county. But we will always remember our stay in Norfolk county as one filled with association with warm-hearted people, and our experiences there shall always be treasured.

NIGHT LIGHTS SHOULD BE PLACED IN POULTRY HOUSES NOW TO ASSURE TOP EGG PRODUCTION THROUGH WINTER

By William F. Rooney

Farm Advisor

For best egg production during the fall and winter it is important to use night lights. Thirteen to 14 hours of total light per day is sufficient to maintain good fall and winter egg production. Since the length of day is approaching 12 hours, night lights should be in use at present.

With a 13 to 14 hour day, the entire pen is lighted, particularly the roosts, with a measure of light called one foot candle. In a 20x20 pen this would be provided by a 100 watt lamp or two 40 watt lamps with reflectors. Many producers use lights from early morning to daylight.

In addition to a better fall and

winter lay, lights are useful in bringing slow maturing pullets into lay and in keeping early hatched pullets in production. During long periods of rain or fog, lights should be used in the daytime to help maintain the rate of lay.

Lights should be continued day after day without interruption until natural light supplies 13 to 14 hours of daylight in the spring. In the spring all changes made on the clock controlling night light should be made gradually, so as not to disturb egg production.

Another system is all-night lighting which continues throughout the year. Shutting off all night lights can lead to a serious drop in egg production.
